WEB TRAFFIC ANALYTICS REPORT | October 2025

Executive Summary

This report presents a comprehensive analysis of web traffic data collected across seven days in October 2025. The data captures visitor behaviour across five key pages - Home, Courses, Blog, Contact, and Admissions - through four traffic sources: Direct, Search, Social, and Referral.

Our analysis reveals clear patterns in how users discover and engage with the website. Search remains the dominant driver of traffic, while Direct visits signal a loyal returning audience. Bounce rate analysis highlights the Blog as the most challenging page for retention, whereas the Contact and Admissions pages demonstrate strong visitor intent and engagement.

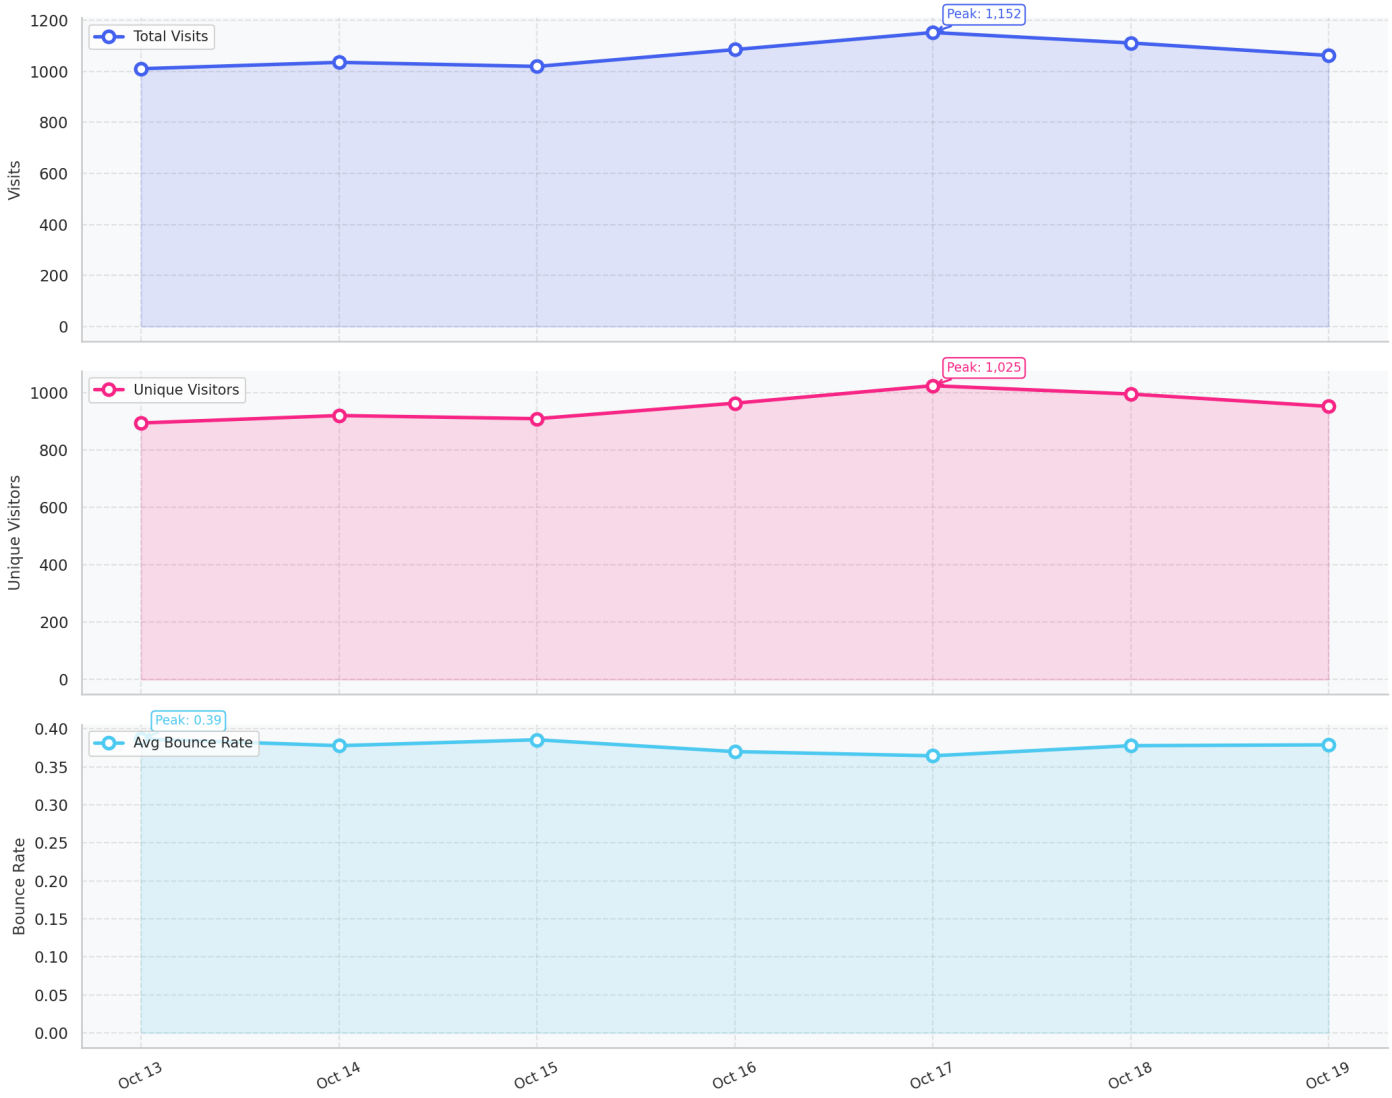
Key Performance Indicators

Total Visits (Week)	7,474
Total Unique Visitors	6,664
Avg Daily Visits	1,068
Avg Bounce Rate	37.7%
Peak Day Visits	1,152
Best Bounce Rate Page	Contact

Traffic Trend - Daily Overview

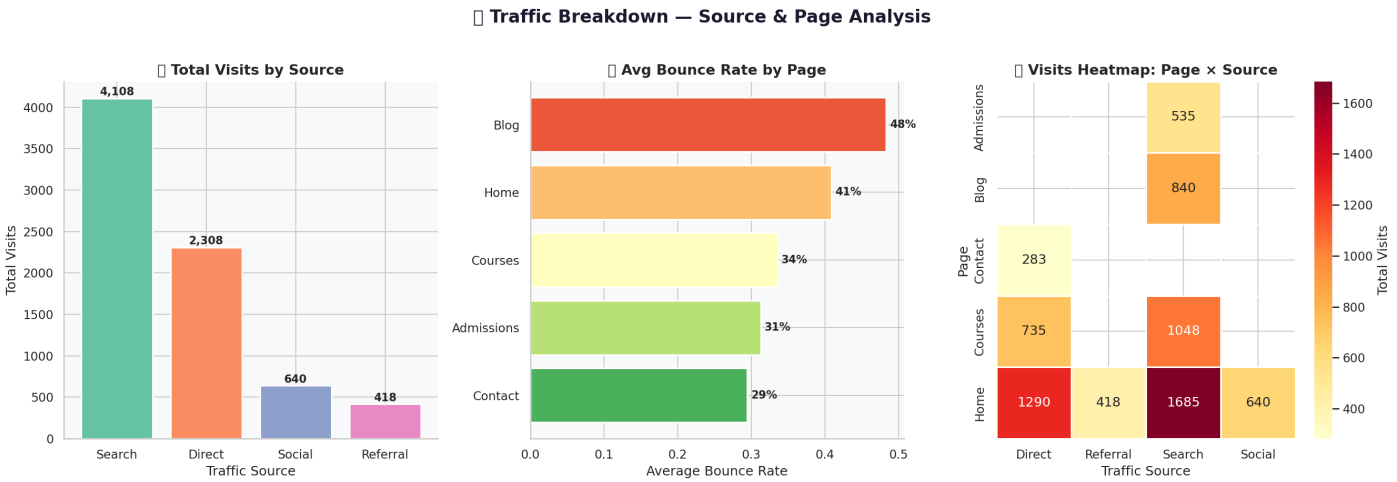
The chart below shows the day-by-day movement of total visits and unique visitors. Friday (Oct 17) recorded the highest traffic, suggesting either a content release or marketing campaign effect. The close tracking between total and unique visitors indicates low repeat-visit behaviour - a growth opportunity.

Web Traffic Dashboard — Daily Trends (Oct 2025)



Traffic by Source & Page

Breaking down visits by source reveals that Search traffic dominates across all pages. The heatmap shows that the Home page captures the broadest cross-channel audience, while Blog and Courses are almost exclusively reached through Search. Social media drives moderate Home page traffic but has limited reach to inner pages - an area for strategic improvement.



Top Pages by Total Visits

Page	Total Visits	Unique Visitors	Avg Bounce Rate
Home	4,033	3,579	40.9%
Courses	1,783	1,562	33.6%
Blog	840	759	48.3%
Admissions	535	497	31.3%
Contact	283	267	29.4%

Recommendations & Next Steps

1. BOOST SOCIAL TRAFFIC: Social media only reaches the Home page. Create shareable links to Courses and Blog to expand reach.

2. REDUCE BLOG BOUNCE RATE: At 48-50%, the Blog has the highest bounce rate. Add related content links, stronger CTAs, and internal navigation.

3. CAPITALISE ON SEARCH DOMINANCE: Search drives the most visits. Invest in SEO for Admissions and Courses pages to convert high-intent visitors.

4. GROW REFERRAL CHANNEL: Referral traffic is the smallest source. Build partnerships and backlinks to diversify the traffic mix.

5. MONITOR PEAK DAYS: Friday spikes suggest responsiveness to campaigns. Schedule key content releases and promotions for Thursdays to maximise Friday peaks.
